

Release Notes

xMid Version 24.13

Content

1. General.....	2
2. Administration.....	2
3. Reporting.....	3
Legend	3

1. General

Description
<p>Extension: Roundcube > E-Mail Usage</p> <p>The dialog for assigning emails has been adjusted. The view has been adapted so that the “Save” and “Cancel” buttons remain visible even with a long list, without having to reduce the browser view.</p>
<p>Extension: Latest Task on Dashboard > Tasks from supplier profile</p> <p>Previously, tasks from the supplier profile were not displayed in the “latest tasks” section of the dashboard. An enhancement has been made here so that the tasks from the supplier profiles will appear in the “latest tasks” app in future..</p>
<p>Extension: new 3LC „ESZ“</p> <p>The list of 3-letter codes has been supplemented by “ESZ” for Essen Hauptbahnhof.</p>

2. Administration

Description
<p>Extension: common rules > improved grids</p> <p>The grids for creating auto actions, bank imports, attachments and e-mail signatures have been improved.</p> <p>This makes it quicker to create new entries, search within the various grids and filter entries.</p>
<p>Bugfix: Automatic calculation of deposit and rest amount</p> <p>If a service is added manually in the order, the automatic calculation of the deposit amount and rest amount for the order was not always carried out correctly. The display of the open amount was also sometimes set to “0.00”, even if the corresponding company setting “recalculate deposit amounts autom” was set.</p> <p>Depending on the company setting being active or not, the automatic calculation takes place correctly again when adding services. When deleting services or price lines, the recalculation is still NOT carried out automatically.</p>

Bugfix: extended order search > grid of agency commission

The agency commission grid can again be searched successfully for the agency number (agency number). Both in the simple search and in the data record search.

extension: display of manual text modules in an order

Previously, all manual text modules were displayed in the drop-down menu, regardless of the customer's language. This has been optimized so that only the text modules of the respective customer language are available in the order.

3. Reporting

Description

Bugfix: Employee rights in connection with the “Tasks” area

If a user or external agency does not have the right to view the “Tasks”, the corresponding menu item „tasks“ is no longer displayed in the navigation. This means that it is no longer possible to click on a task in the task overview (list) and therefore no longer be able to check the bookings etc..

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
