1. In General

Description
<p>Bugfix: iris.plus Error Message</p> <p>xMid displayed a misleading error message (iris.plus error - URL missing or incorrect) if the agency assignment or activation is not stored correctly in iris.plus. This has been corrected. The new error message reads as follows:</p> <p><i>Agency not activated.</i></p> <p><i>Iris error message: no agency associated..</i></p>

2. xArc/ xStore

Beschreibung
<p>Extension: Automatic updating of the document dropdown in manual posting</p> <p>If a receipt from the temporary receipt storage is assigned to the posting record during manual posting, then stacked and a second posting record is created directly, the dropdown of available receipts is updated automatically immediately. Previously, the tab had to be reloaded or the document already assigned was still available for selection.</p>

3. Order

Beschreibung
<p>Bugfix: Automatic document dispatch > Multiple use of voucher dispatch</p> <p>An error has been fixed for automatic document dispatch. The „multiple rule usage“ of the voucher dispatch after a flight time change is executed correctly again.</p>
<p>Extension: complex Voucher > new placeholder "cabin" for service type "SHIP"</p> <p>For the printing of travel documents, the complex vouchers were supplemented by the placeholder "Cabin" for the service type "Ship" .</p>
<p>Extension: BSP-Codes for Airlines</p> <p>The BSP code (also carrier ID or IATA accounting code) 333 was added for the airline Viva Aerobus (VB) and the code 814 for Eurostar (9F).</p>

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
