1. In General

Art	Beschreibung
Extension XMID-2040	Eventimporter: The email address created by the event importer in the customer profile is automatically marked as "default" during import.
Extension XMID-2254	Airline Codes: The list of airline codes has been updated. Lanmei Airlines with IATA code "LQ" was added and IATA code "PU" was updated to Plus Ultra Lineas Aeras.

2. Order

Art	Beschreibung
Extension XMID-2193 XMID-2219	<p>Extended order search > services:</p> <p>In the "Services" tab of the advanced order search, it is now possible to filter by "cancellation date" in the date search. Thus, all canceled services of a certain period can be queried.</p> <p>Accordingly, the grid of the extended service search has been extended by the column "Cancellation date". This shows the date on which the service was canceled.</p> 

3. xArc / xStore (payable module)

Art	Beschreibung
Bugfix XMID-2208	<p>CAMT > Delete linked documents at the temporary receipt storage:</p> <p>If a document was attached to a posting record in a CAMT file and this was deleted from the temporary receipt storage before posting, the CAMT file could no longer be posted. This has been fixed so that attached documents can be deleted from the document buffer and the link to the posting record is removed. The CAMT file can then be posted accordingly.</p>
Extension XMID-2213	<p>Copy Barcode in account sheet</p> <p>The barcode of the archived document for a posting record could previously only be displayed in the account sheet via mouseover. The function has been extended so that the barcode can also be marked and copied.</p> 

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
