# 1. In General

Typ	Description
Extension XMID-1809	<b>AER-Cockpit-Import: Missing flight segments</b> Additional segments of the data deliveries are now checked. This can ensure a better availability of the flight segments.
Extension XMID-1844	<b>Carrier ID update for the airline Aeromar (VW):</b> The IATA accounting code for the airline Aeromar (VW) has been updated. The IATA code "VW" is linked to the accounting code 942 and is available in xMid in the tickets as "Carrier ID".
Bugfix XMID-1846	<b>Advanced Order Search &gt; Ticket: Correction for the results in the grid</b> The result list under Advanced Order Search > Ticket did not match the search criteria if the restrictions on customer number and time period were desired. The error has been fixed and the combination of different search criteria is possible again.

## 2. xTour (Module for tour operators)

Art	Beschreibung
Bugfix XMID-1858	<p><b>xTour - Allotments:</b></p> <p>An error in the allotment management of xTour services has been fixed. If an allotment was only created for a certain period and exactly this period was booked, the allotment was not deducted. This error has now been fixed..</p>
Bugfix XMID-1851	<p><b>xTour - ratings of the package, RR (circular tour) and group bookings:</b></p> <p>If a circular tour, group trip or package was booked from xTour, the star category of the hotel was not transferred. This error has now been fixed. The star rating will be mapped correctly in the future and can thus also be printed on documents.</p>
Bugfix XMID-1884	<p><b>Copying orders with allotments:</b></p> <p>If an order was duplicated, an error occurred if there were not enough allotments left in the services. The operation could still be duplicated. This error has been fixed. It is no longer possible to duplicate an order if there are not enough allotments. In the future, an error message will appear at this point.</p>

## Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
