# 1. General

## Description

### Extension: user profile > process optimisation for storing the O-Auth account (password change)

In the user profile, it is now possible to update the email address and password for an oAuth email account using a refresh button (if this has been changed previously in the Microsoft account).

Linked processes, such as automatic emails from orders, are now also updated automatically and no longer need to be processed manually.

Pressing the refresh button opens a window where the email address and password are requested again and verified by Microsoft.

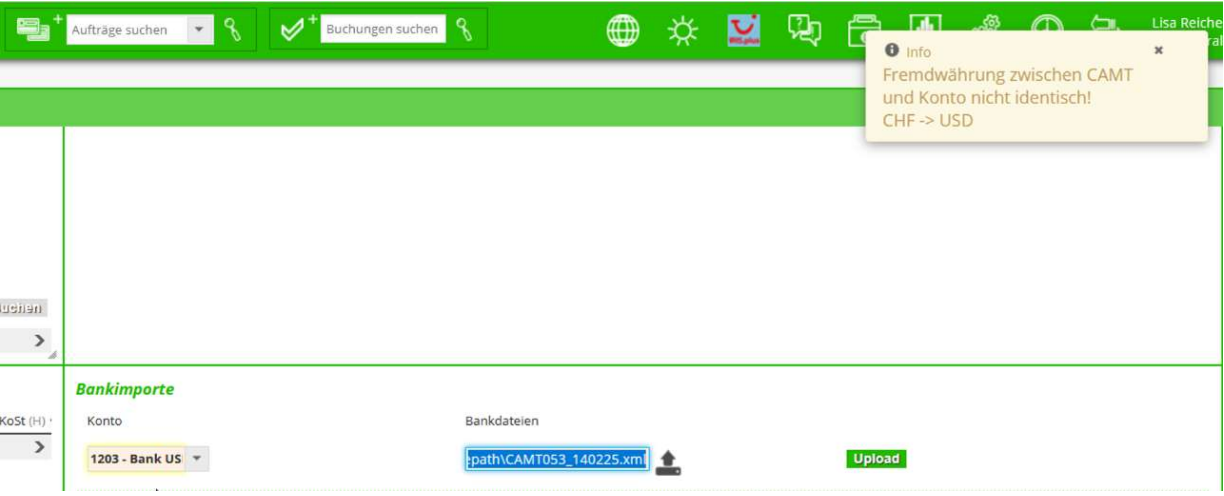

After entry, they are automatically saved in the employee profile.

### Extension: booking search > reports > spi-statistics

The grid in the spi-statistics area in the accounting reports has been optimised so that sorting, filtering and searching now produce faster results.

## 2. Accounting

| Description   |  |
|---|--|
| <p><b>Extension: CAMT import &gt; warning message if the currency in the file differs from that in the account</b></p> <p>If an account with a different currency is assigned to a CAMT file, a warning message will appear in future. However, this will not prevent the file from being uploaded.</p>   |  |
|  <p>The screenshot shows a software interface with a green header bar. Below the header, there is a search bar with 'Aufträge suchen' and 'Buchungen suchen'. A warning message box is displayed, stating: 'Info Fremdwährung zwischen CAMT und Konto nicht identisch! CHF -&gt; USD'. Below the warning, there is a section titled 'Bankimporte' with a 'Konto' dropdown menu set to '1203 - Bank US'. A file path 'path\CAMT053_140225.xml' is entered in a text field, and an 'Upload' button is visible.</p> |  |
