Description

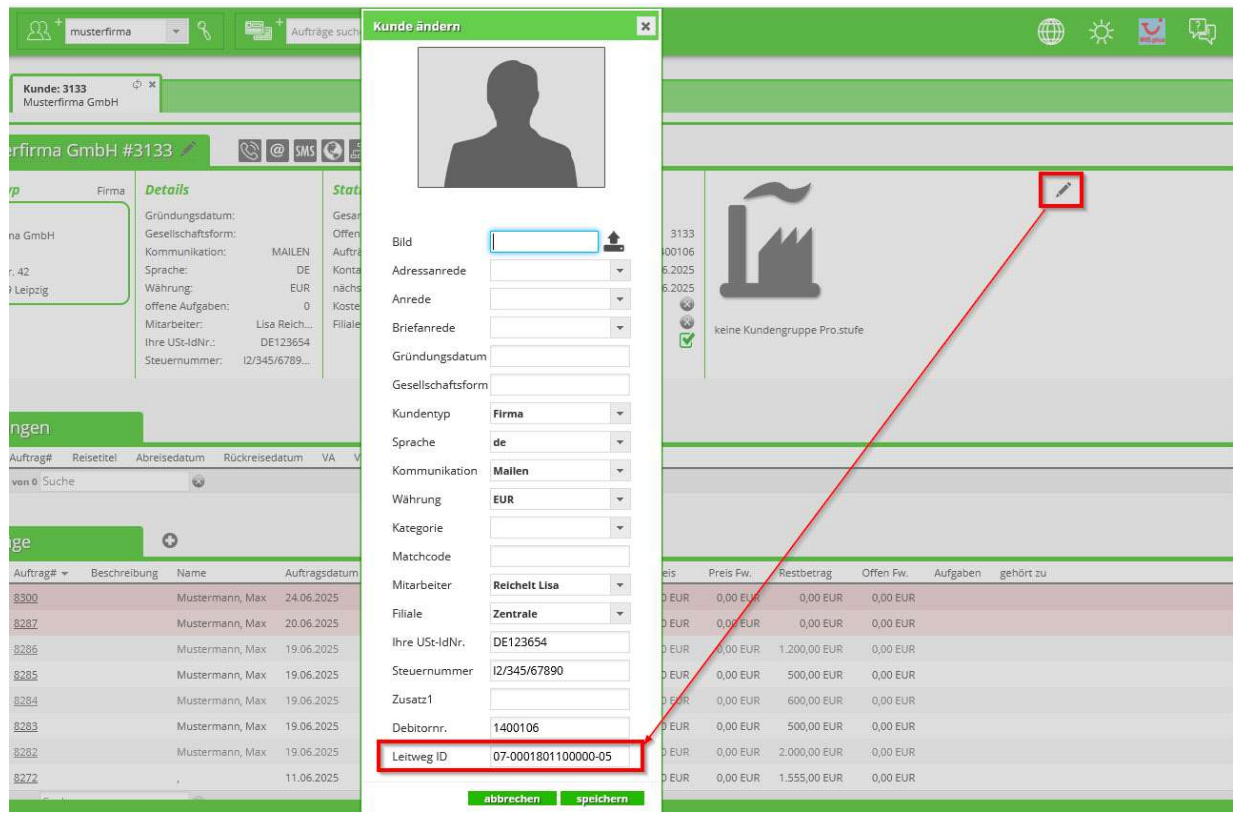

Extension: automatic supplier mails > error handling

It is now possible to create an automatic task in the event of an error for automatic supplier mails that are sent to the supplier. This takes effect if the job is created but cannot be executed.

Extension: e-invoice > routing ID for public authorities

A so-called routing ID can now be stored in the customer profile. This is displayed in the corresponding field in the e-invoice xml file. This criterion is only relevant for sending e-invoices to public authorities in Germany.

The routing ID is received accordingly from the public legal entities.

The screenshot shows the 'Kunde ändern' (Change Customer) modal in the TraSo system. The modal contains the following fields:

- Bild:
- Adressanrede:
- Anrede:
- Briefanrede:
- Gründungsdatum:
- Gesellschaftsform:
- Kudentyp:
- Sprache:
- Kommunikation:
- Währung:
- Kategorie:
- Matchcode:
- Mitarbeiter:
- Filiale:
- Ihre USt-IdNr.:
- Steuernummer:
- Zusatz1:
- Debitornr.:
- Leitweg ID:

At the bottom of the modal are buttons for 'abbrechen' (cancel) and 'speichern' (save). The main customer profile view in the background shows a table with columns: Preis Fw., Restbetrag, Offen Fw., Aufgaben, gehört zu. A red box highlights a pencil icon in the top right corner of the main view, with a red line pointing from the 'Leitweg ID' field in the modal to it.

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
