1. xArc

description
<p>Extension: Document upload in SP-import</p> <p>The document upload function has been extended to the SP-import in supplier invoice area. It is now possible to attach documents and/or barcodes to an import or to individual import positions for archiving. Further information can be found in the manual via the following link:</p> <p>https://wiki.xmid.de/doku.php?id=root:xmid:x15xarc:15.5doklta#dokumente_im_It-import</p>

2. Order

description
<p>Extension: ERV/ERGO travel cancellation insurance</p> <p>An extension has been made for insurance bookings with ERV/ERGO made via xMid. In addition to the tariff name, further information regarding the components of the respective product is now displayed.</p> 

3. Customer

description

Bug: Display of credit card type for tokenised credit cards in the customer profile

For credit cards tokenised via UnzerOne, the card type was always displayed as VISA in the customer profile, even if the card was actually an AMEX, MasterCard, etc. The issue has been resolved and the correct card type is now displayed in the customer profile.

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
