# 1. order

description										
<b>Extension: new field „giata id”</b>										
There is a new field in the order for the service type hotel and package tour: giata id.										
Here you can add a giata id manually or it comes from an interface.										
 <p>The screenshot shows a form titled "service PA package tour". It includes fields for service type (PA package tour), tour operator (2VBY - Ein zweiter Hot), collection (A), product type (Standard), and traveller (2 selected). Below these are date and flight details. At the bottom, there is a table with columns: transfer, hotel type, count, room, code, meal type, code, giata id, and remark213. The "giata id" field contains the value "25485" and is highlighted with a red box.</p>										
<b>Bugfix: search for services</b>										
In the extended (order) search in the area “services” the search for departure date service is possible again.										

# 2. accounting

description
<b>Extension: BSP-Code for UR</b>
The BSP-Code for the Airline Uganda Airlines is available.

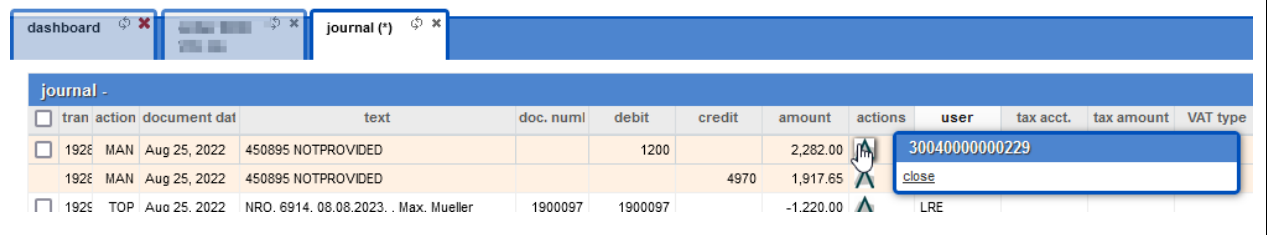

### 3. xArc / xStore (paid module)

description

**Extension: link to the document also in journal**

In the accounting – journal you can see the link to the existing document. Same logic for the existing function in an account sheet:

In the column “action” you can see the A-symbol for active archive module and existing document. There is the barcode, you can click on it to open the document and you can also copy the barcode from the mouseover box.
