1. In General

Art	Beschreibung
Erweiterung XMID-1560	<p>New payment type "discount"</p> <p>In Administration > Accounting > Payment types a new payment type can be created. This can be used for the use of discounts as a "payment type". It has nothing to do with the discount price rules. For customers who use our product xIBE, it is possible to enter a discount code and/or voucher code when booking via their own homepage. These two "payment types" are then created in xMid as a payment and booked accordingly as a payment received.</p>
Bugfix XMID-1493	<p>Modify the affiliate provision</p> <p>The affiliate commission search and result grid has been improved. The search filters "Payment type" and "Voucher type" were removed as they had no function. Likewise the checkboxes "Cumulated" and "Extended". As in many other areas, the grid editing has been completely revised. The free search, the sorting and the record search can be used.</p>
Erweiterung XMID-1521	<p>Postmaster – Automatic mails to customers (extra module)</p> <p>In Postmaster there is a possibility to send an e-mail to the customer to inform him about an incoming payment from the previous day.</p> <p>For this purpose there is the type "Customer payment". If a branch is selected in the creation rule, the system will check during dispatch whether the branch of the order to which the payment was posted also matches the branch of the rule.</p> <p>Previously, the branch from the customer profile was checked for this rule type.</p>
Erweiterung XMID-1613	<p>Airline OV</p> <p>The name of airline OV was changed in Salam Air.</p>
Erweiterung XMID-1536	<p>Extended rule for document rules</p> <p>Under Administration > common rules > Validation rules > Document rule, the document type "complex vouchers" has been added for the definition of the rules in the drop-down menu for "documents already sent".</p>

2. customer

Art	Beschreibung
Erweiterung	Extended customer search
XMID-1561	In the advanced customer search there is a new search criterion for next/last departure. The next/last departure is an already existing field in the customer profile. In the result list, the column "next/last departure" is selectable for display on the screen and for export.

Legend

Extension = Software extension, new functions may be associated with additional costs. If you are interested, please contact support, who will be happy to advise you.

Bugfix = error fixing
