

Release Notes

xMid Version 23.04

The most important changes in the new version:

Für die Flugzeiten einer Flugleistung wurde eine Validierung eingebaut, so dass falsche Zeitformate nicht mehr zu Fehlern führen können.

Die LT-Importe für IATA/BSP können wieder erfolgreich nach Namen oder Ticketnummern durchsucht werden.

1. In General	3
2. Order.....	4
3. Accounting.....	5
Legend.....	6

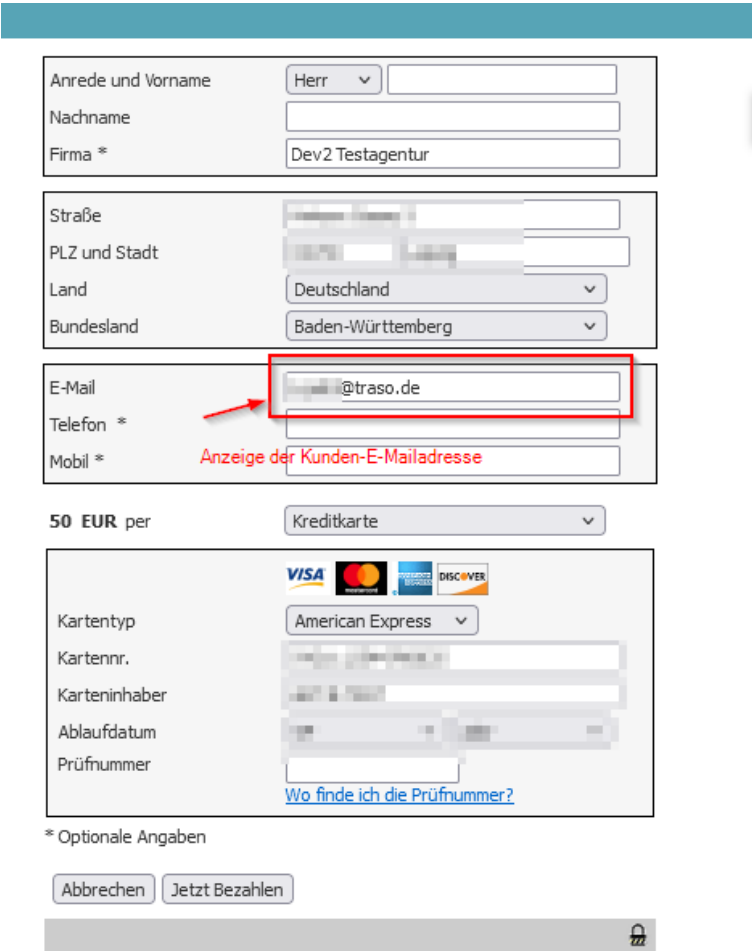

1. In General

Type	Description
Bugfix XMID-1938	Shop Holidays: Lack of takeover of participants When importing orders via the ShopHolidays interface, the participants were not always imported correctly. The error is fixed and the participants are completely available in the imported orders.
Bugfix XMID-1950	Exfinity: No transfer of the additional_info into the text modules The transfer of data from Exfinity has been adjusted. In the future, the trip description from the delivery will no longer be automatically transferred to the text module editor in the order.
Extension XMID-1977	xArc/xStore: Account sheet - show barcode If a document was stored in a posting record via the certified archive or via the document buffer, the barcode that forms the link to the archive was previously not visible in the account sheet. In the future, the barcode can be displayed in the account sheet as soon as the mouse is moved over the archive symbol.
Extension XMID-1998	South Sudan in country table In the country table, the country South Sudan has been added and can now be used.

2. Order

Type	Description
Extension XMID-1918	<p>Order > Services > Validation off light times in flight services</p> <p>When manually creating flight services, times could be saved in an invalid format. In the future, the time will be checked and automatically converted to the correct format (hh:mm).</p>
Bugfix XMID-1958	<p>Copying an order with multiple hotel services does not take into account allotments</p> <p>When copying an order that contains services from xTour, all allotments are now correctly deducted again or returned in case of cancellation. It is also taken into account if several hotel services are included and the allotments are checked before copying. If not enough contingents are available, an error message appears and copying is not possible.</p>

3. Accounting

Type	Description
Bugfix XMID-1887	<p>Accounting: manual posting > Reverse charge-tax accounts the wrong way around with expense account in the credit side</p> <p>When applying a reverse charge tax key, an incorrect tax account posting record was formed if the expense account was in credit. This has been fixed so that if the expense account is in credit, the reverse charge posting record "Sales tax to input tax" is formed.</p>
Erweiterung XMID-1900	<p>Payment settlement with Heidelpay:</p> <p>With this release, the complete and correct customer data is transferred to the payment mask for Heidelpay. Previously, a fixed address was inserted in the "E-mail" field. The change means that the customer's e-mail address, which is marked as the default, is transferred from the customer profile to the mask.</p>  <p>The screenshot shows a payment mask with the following fields:</p> <ul style="list-style-type: none"> Anrede und Vorname: Herr Nachname: [Redacted] Firma *: Dev2 Testagentur Straße: [Redacted] PLZ und Stadt: [Redacted] Land: Deutschland Bundesland: Baden-Württemberg E-Mail: [Redacted]@traso.de (highlighted with a red box and arrow) Telefon *: [Redacted] Mobil *: [Redacted] 50 EUR per: Kreditkarte Kartentyp: American Express Kartennr.: [Redacted] Karteninhaber: [Redacted] Ablaufdatum: [Redacted] Prüfnummer: [Redacted] <p>* Optionale Angaben</p> <p>Buttons: Abbrechen, Jetzt Bezahlen</p>

Bugfix	IATA/BSP: Search by ticket number and name
XMID-1983	An error has been fixed in the Accounting > Service provider accounting area. It is possible again to search for names or ticket numbers in the "Search" field in the "SP Import" tab. The import(s) that contain the search criterion are displayed highlighted in green..

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
