# 1. General

Description
<p><b>Extension: creating and sending invoices as e-invoices</b></p> <p>As part of the German Federal Government's Growth Opportunities Act, which regulates the mandatory use of e-invoices between domestic companies in Germany from 1 January 2025, we have implemented the creation of e-invoices in xMid.</p> <p>We use the ZUGfERD format.</p> <p>You can find more information and assistance in our manual and on our Memberspot training platform.</p>
<p><b>Extension: dashboard &gt; latest orders &amp; latest offers</b></p> <p>The grids for 'latest orders' and 'latest offers' have been optimised in the dashboard area. The search and sorting function has been improved.</p> <p><b>Extension: advanced order search &gt; orders</b></p> <p>The grid has been optimised in the advanced order search area. The search and sorting function has been improved.</p>
<p><b>Bugfix: payment control &gt; debit list &gt; open LSV</b></p> <p>If you wanted to open the view of the SEPA files created in the direct debit list via the LSV button, this was only possible if orders were selected. The view can now be opened again without selecting orders.</p>

## 2. xArc/ xStore

description
<p><b>Extension: CAMT file &gt; display the list of attached invoice documents</b></p> <p>If several documents are attached to a posting item in the CAMT file, the list of all attached documents/bar codes is displayed by hovering over the PDF symbol. Click on the individual receipts to open them separately.</p> 

## Legend
