1. General

Description
<p>Extension: New payment method “Klarna”</p> <p>SOFORT has cancelled contracts with their the customers as of 30.09.2024 and is consolidating the products under KLARNA. The corresponding product at KLARNA is called KLARNA PAY NOW.</p> <p>The previous interface for using the “SOFORT” payment link (Sofortüberweisung) is expected to stop working at the end of September.</p> <p>We have implemented a new interface as an alternative: “Klarna”</p> <p>The setup/activation is subject to a charge. If you are interested, please contact us via the Service Desk</p>
<p>Bugfix: IrisPlus bookings > Display of the destination in the order overview</p> <p>For IrisPlus bookings, the wrong destination was sometimes read from the imported files as the region in the order overview. The error has been corrected so that the destination shown is the one supplied in the booking. The prerequisite is that the option “Region from destination” is set under Administration > common rules > Interfaces.</p>
<p>Bugfix: Dashboard-App „Latest tasks“</p> <p>In the “latest tasks” App, you can again filter by due date.</p>

2. Administration

Description
<p>Bugfix: Postmaster rules > missing E-Mails</p> <p>In the Postmaster under Administration > commin rules, a check for entering numbers has been added to the rules. Only positive numerical values >0 can now be entered. Negative values led to the e-mail dispatch in affected databases coming to a standstill.</p> <p>We recommend checking the rules accordingly and saving them again.</p>

3. Accounting

Description
<p>Bugfix: CAMT > action SMA > tax keys in T-Account</p> <p>If a posting record was posted with the SMA action from the CAMT file, it did not display the tax keys when the posting records were created in the T-account. It was still posted correctly with VAT. The display error has been corrected.</p>
<p>Extension: Payment control > Creation of SEPA file > Selection of payment types</p> <p>Previously, all payment types were made available for selection in the direct debit list in the payment control when the SEPA file was created. This has been optimized so that from now on only those payment types are displayed that contain the payment type "Direct debit".</p>

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
