description

extension: better Performance

Loading the list of imported/ignored processes in the inbox has been improved. This area is displayed with a user right.

crs	type	name	tour oper	new	tour op number
Book ...	OK	1 ...	1 HO	imported/ignored	20240314_1
XRes	OK	2 ...	3 HOL		9874111

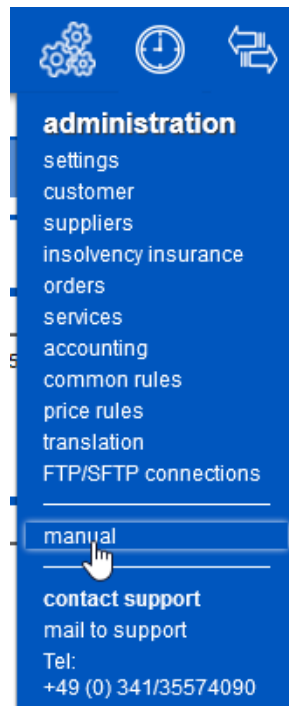

extension: orders in foreign currency

1. for orders in foreign currency, the amount in standard currency was displayed in the order overview in the field "open deposit", while the foreign currency amount was displayed in all other payment columns. This has been adjusted and the foreign currency amount is also displayed in the "Open deposit" column.

2. if the placeholder {open_amount} is used in the postmaster and it was a foreign currency order, then the open amount is shown in the corresponding foreign currency of the order.

extension: Open manual in foreign language (en)

Depending on the user's language, the manual is now opened in German or English via the link in xMid

extension: Change of airline code

The airline code for the airline Air Anka has been changed to 6K (previously TZ)

extension: New placeholder

For example under administration - common rules - Email texts, a new placeholder has been added for e-mails to suppliers. This contains the "purchase_price" and now offers the option of sending purchase prices to the supplier in a ready-made e-mail.

Legende

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice. Bugfix = Fixing of errors
