

Release Notes

xMid Version 25.01

Content

1. General.....	2
2. xTour	2
3. Accounting.....	3
Legend.....	3

1. General

Description
Extension: List of airlines
The airline 'PopulAir' (HP) with the BSP code 415 has been added to the list of airlines. The airline 'Xiamen Airlines' (MF) has been revised and the BSP code 731 has been correctly assigned.

2. xTour

Description
Bugfix: add multiple room bookability
With xTour bookings, it is now possible to book more than one room of the same category in one booking. The price is doubled or tripled according to the requested room and the room price from xTour is taken as the basis.

3. Accounting

Description
Bugfix: optimisation of the hide function in the currency table If a currency rate was hidden under administration > accounting > currency , it could no longer be used. From now on, hidden exchange rates are also available as soon as they are active and used for the corresponding exchange rate period.

Legend

Extension = Software extension, new function may be associated with additional costs. Please contact your support if you are interested, we will be happy to help you with advice.

Bugfix = Fixing of errors
